

Dear Parents,

It is a matter of common knowledge that, in today's digital age, many students are actively engaging on social media platforms such as Instagram, Snapchat, and similar applications—sometimes without parental awareness or supervision.

While these platforms offer opportunities for connection, they may also expose students to interactions and content that are not appropriate for their age. Instances of posting or sharing messages, images, or comments that may be hurtful, derogatory, or provocative can lead to misunderstandings, conflicts, and emotional distress among students.

We sincerely request parents to kindly:

1. Monitor and guide their child's use of social media
2. Ensure that their ward is not engaging in age-inappropriate platforms or activities
3. Counsel them on the importance of respectful communication and responsible online behavior
4. Emphasize the values of digital safety, empathy, and mutual respect

In the interest of maintaining a focused and secure learning environment, students are also **not permitted to carry mobile phones** or similar electronic gadgets to school.

If such items are found, the school reserves the right to take appropriate action as per its policies.

We believe that a strong partnership between school and parents is essential in guiding children toward safe, respectful, and responsible behavior—both online and offline.

Your cooperation and support in reinforcing these values at home are greatly appreciated
